The Integrated Child Development Services (ICDS) is Government of India’s (GoI) flagship programme.

This brief uses government reported data to analyse ICDS performance along the following parameters:
- Overall trends in allocations and expenditures
- Expenditure of Supplementary Nutrition Programme (SNP)
- Vacancies amongst human resources
- Coverage of beneficiaries and malnutrition rates

Cost share and implementation: GoI funds 50 per cent of the share for SNP with states providing the remaining 50 per cent. In FY 2017-18, the fund sharing ratio for salaries of staff such as Child Development Project Officer and Supervisor have been revised. GoI will contribute 25 per cent of the funds, with states providing 75 per cent.

GoI allocations for MWCD increased by 25 per cent from ₹17,640 crore in Financial Year (FY) 2016-17 to ₹22,095 crore in FY 2017-18 Budget Estimates (BE).

During this same period while allocations for umbrella ICDS also increased by 25 per cent, those for ICDS Core or Anganwadi Services increased by only 5 percent from ₹14,561 crore in FY 2016-17 to ₹15,245 crore in FY 2017-18.

Expenditures on the Supplementary Nutrition Programme (SNP) has been decreasing. Between FY 2015-16 and FY 2016-17, expenditure on SNP decreased by 6 per cent from ₹14,403 crore in FY 2015-16 to ₹13,514 crore in FY 2016-17.

There are a large number of vacancies in sanctioned posts. As on March 2017, 39 per cent of sanctioned positions for CDPOs and 35 per cent of sanctioned positions for Supervisors were vacant across the country.

The proportion of ICDS beneficiaries who are malnourished has been increasing. In March 2015, 15 per cent of ICDS beneficiaries were malnourished. This increased to 22 per cent by March 2016 and 25 per cent as on September 2017.
The Integrated Child Development Services (ICDS) is Government of India’s (GoI) flagship programme aimed at providing basic education, health and nutrition services for early childhood development. These objectives are delivered through a package of six services:

- Supplementary Nutrition (SNP)
- Non-formal Pre-School Education (PSE)
- Nutrition and health education
- Immunization
- Health check-ups
- Referral services

While the first three schemes are implemented by the Ministry of Women and Child Development (MWCD), the remaining three come under the ambit of the Ministry of Health and Family Welfare (MoHFW).

In FY 2016-17, GoI renamed and restructured the ICDS into Umbrella ICDS with the inclusion of 3 other sub-schemes within its ambit. The number of sub-schemes under Umbrella ICDS was further increased in 2017, with the re-establishment of the National Nutrition Mission- an apex body for all nutrition related activities and the launch of the Pradhan Mantri Matru Vandana Yojana (PMMVY) aimed at providing a cash incentive to mothers for safe delivery.

Accordingly, Umbrella ICDS now consists of the following sub-schemes:

- Anganwadi Services (in place of ICDS)
- Scheme for Adolescent Girls (earlier known as SABLA)
- Child Protection Services (earlier known as the Integrated Child Protection Scheme)
- National Crèche Scheme (earlier called the Rajiv Gandhi National Crèche Scheme)
- National Nutrition Mission and,
- Pradhan Mantri Matru Vandana Yojana (PMMVY)

This brief focuses on ICDS core or Anganwadi Services.

**TRENDS IN GOI ALLOCATIONS, RELEASES AND EXPENDITURES**

**Allocations**

- Budgetary allocations for MWCD increased by 25 per cent from ₹17,640 crore in FY 2016-17 to ₹22,095 crore in FY 2017-18 (BE).

- During the same period while allocations for umbrella ICDS also increased by 25 per cent, those for ICDS Core or Anganwadi Services increased by only 5 percent from ₹14,561 crore in FY 2016-17 to ₹15,245 crore in FY 2017-18. The share of Anganwadi Services out of total MWCD budget has thus decreased from 83 per cent in FY 2016-17 to 69 per cent in 2017-18.
ONLY 5% INCREASE IN ALLOCATIONS FOR ANGANWADI SERVICES/ICDS CORE BETWEEN 2016 AND 2017

There are significant gaps between the allocations approved by the Expenditure Finance Committee (EFC) for the 12th Five Year Plan and actual GoI allocations (Revised Estimates). For the plan period, the EFC had approved a total of ₹1,23,580 crore. Total GoI allocations between 2012 and 2017 however were only ₹78,768 crore, 64 per cent of the EFC approved numbers.

The gap between EFC approved allocations and actual GoI allocations has been increasing. In FY 2015-16, the EFC had approved ₹28,453 crore to be allocated for Anganwadi Services; GoI allocations stood at ₹15,484 crore (54 per cent of the cabinet approved allocations). Similarly, in FY 2016-17, while the EFC had recommended ₹30,025 crore, only ₹14,561 crore (48 per cent) had been allocated for the scheme.

GOI ALLOCATIONS BETWEEN 2012-17 WERE 64% OF THE EFC APPROVED ALLOCATIONS

TRENDS IN COMPONENT-WISE ALLOCATIONS AND EXPENDITURES

Supplementary Nutrition Programme (SNP)

- Under SNP, beneficiaries are given hot meals along with take-home rations for pregnant and lactating mothers. For children, the quantum of meals depends on their malnutrition levels.

- In 2017, GoI announced the revision of the cost norms for SNP from ₹6 per day to ₹8 per day per child for 6 months-6 years; ₹7 to ₹9.50 per day for pregnant and lactating mothers; and ₹9 to ₹12 per day for severely malnourished children.

Expenditures

- Between FY 2015-16 and FY 2016-17, total SNP expenditure declined by 6 per cent from ₹14,403 crore in FY 2015-16 to ₹13,514 crore in FY 2016-17.

- There are some state differences. For instance, between FY 2015-16 and FY 2016-17, SNP expenditure in Jammu and Kashmir and West Bengal decreased by 55 per cent and 45 per cent, respectively. Expenditure was also significantly lower in FY 2016-17 compared to the previous year in Gujarat (39 per cent) and Maharashtra (24 per cent). On the other hand, expenditure on SNP in Karnataka increased by 22 per cent.

FOR MOST STATES, SNP EXPENDITURES FELL BETWEEN 2015-16 AND 2016-17

- While the quantum of funds spent on SNP have been low and decreased between FY 2015-16 and FY 2016-17, most states spent more than the funds approved for SNP in FY 2016-17. For instance, expenditure as a proportion of approved funds was 187 per cent in Manipur and 174 per cent in Nagaland. Similarly, expenditure was significantly more than approved budgets in Kerala (148 per cent), Karnataka (141 per cent). In contrast, expenditure as a proportion of approved budgets was low in Jammu and Kashmir at 41 per cent.

- Higher expenditure than funds available have resulted in states having large negative balances. For instance, at the start of FY 2017-18, both Madhya Pradesh and Karnataka had a negative opening balance of over ₹100 crore.
MOST STATES RECORDED HIGHER EXPENDITURES FOR SNP THAN APPROVED BUDGETS IN 2016-17

TRENDS IN ANGANWADI CENTRES

- The Anganwadi Centre (AWC) is the first point of service delivery for health, nutrition and early learning for children at the village level. As on 30 September 2017, of the 14 lakh sanctioned AWCs, 13.59 lakh (97 per cent) were operational.

- There are, however, significant state differences. As on 30 September 2017, 20 per cent of sanctioned AWCs in Bihar and 13 per cent of sanctioned AWCs in Nagaland were not operational. The proportion of non-functional AWCs was also high in Jammu and Kashmir and Chhattisgarh at 7 per cent and 5 per cent, respectively.

20% OF SANCTIONED AWCS IN BIHAR WERE NOT OPERATIONAL AS ON 30 SEPTEMBER 2017

Source: Lok Sabha Unstarred Question Number 1316, MWCD. Answered on 22 December 2017. Last accessed on 10 January 2018.
Many existing AWCs do not have required facilities. For instance, as on September 2016, only 70 per cent of AWCs/mini-AWCs had drinking water facilities and only 63 per cent had toilet facilities.

TRENDS IN HUMAN RESOURCES

ICDS centres are managed by a hierarchy of administrators including: Anganwadi Workers (AWWs), Anganwadi Helpers (AWHs) at the AWC; Supervisors, Child Development Project Officers (CDPOs) at the block level; and District Programme Officers (DPOs) at the District Collectorate.

AWWs and AWHs, also known as Sevika and Sahayika, are local women volunteers responsible for the implementation of the programme on a monthly honorarium.

At the block level, all ICDS projects are supervised by the CDPO. The CDPO is in charge of supervising the work of the AWWs and ensuring logistical and coordination support with the health department, among others. In larger rural and tribal projects, Additional Child Development Project Officers (ACDPOs) are also part of the ICDS Team. In addition, there are also Supervisors to monitor the AWC functioning. As per GoI norms there should be 1 Supervisor for every 25 AWCs.

There are a large number of vacancies in posts for CDPOs and Supervisors. As on March 2017, 39 per cent of sanctioned positions for CDPOs and 35 per cent of sanctioned positions for Supervisors were vacant across the country. There has been no improvement in the vacancy rates in the last three years.

39% OF CDPO POSTS AND 35% OF SUPERVISOR POSTS WERE VACANT AS ON MARCH 2017

Source: RTI response by the MWCD as on 13 December 2017.

There are significant state variations. Maharashtra, Rajasthan, Uttarakhand, West Bengal, Gujarat, and Chhattisgarh had more than 50 per cent of CDPO/ACDPO vacant sanctioned posts. West Bengal had a vacancy rate of 63 per cent among sanctioned Supervisor positions.
76% of CDPO posts were vacant in Maharashtra, and 63% of supervisor posts vacant in West Bengal as on March 2017

COVERAGE OF BENEFICIARIES

- Between March 2015 and March 2017, the number of beneficiaries receiving non-formal education decreased from 3.7 crore to 3.4 crore. On the other hand, the number of beneficiaries (6 months to 6 years) receiving SNP decreased by 4 per cent from 8.3 crore to 8 crore. Similarly, the number of pregnant and lactating mothers who received SNP also decreased by 6 per cent from 1.9 crore to 1.8 crore.

- There are differences in the number of children registered in an AWC and the number of children receiving SNP. As on March 2017, 88 per cent of children registered in an AWC in Odisha and 83 per cent in Gujarat received supplementary nutrition. In contrast, only 39 per cent of children registered in AWCs in Haryana and 33 per cent in Rajasthan received supplementary nutrition.

Odisha and West Bengal had the highest ICDS beneficiaries out of the registered population of 0-6 year olds

OUTCOMES

- The primary objective of the SNP programme within ICDS is to reduce the nutrition gap among children between the ages of 0 to 6 years and improve the nutritional status of pregnant and lactating mothers.

- At the start of the 12th Five Year Plan, the mission had set the following targets:
  - Reduction in percentage of underweight children below 3 and 5 years (separately) by 10 percentage points
  - Halving the percentage of severely underweight children below 3 years
  - Reducing the prevalence of anaemia in pregnant women by 20 per cent
  - Decreasing the incidence of low birth-weight babies by 10 per cent, and
  - Percentage of 5-6 year old children at the AWCs who are school ready by 60 per cent

- Progress on these outcome indicators have been slow. Between 2005-2015, as per the third and fourth round of the National Family Health Survey (NFHS), the percentage of children under 5 who were underweight decreased from 43 per cent to 36 per cent and the percentage of pregnant women who were anaemic decreased from 58 per cent to 50 per cent.

- During the same time period, the percentage of children who were wasted (low weight for height) however increased by 1 percentage point, while those that were severely wasted increased by 2 percentage points.

![2 PERCENTAGE POINT INCREASE IN CHILDREN UNDER 5 WHO WERE SEVERELY WASTED BETWEEN 2005 AND 2015](image)

- The findings are consistent with the official reported number as per ICDS beneficiaries. The proportion of total ICDS beneficiaries who are malnourished has been rising. As on March 2015, 15 per cent of total ICDS beneficiaries were malnourished. This increased to 22 per cent as on March 2016 and 25 per cent as on September 2017.

- There are, however, significant state wise differences. As on March 2015, the proportion of ICDS beneficiaries that were malnourished was the highest in Bihar at 48 per cent. This decreased marginally to 46 per cent as on September 2017. Proportion of beneficiaries malnourished decreased in West Bengal and Punjab.
The number of children identified as severely malnourished under ICDS was high in Assam, Bihar, Chhattisgarh, Uttar Pradesh and Madhya Pradesh as on September 2017. For instance, the proportion of children severely malnourished was 15 per cent in Assam and 10 per cent in Bihar.

**15% OF ICDS BENEFICIARIES WERE SEVERELY MALNOURISHED IN ASSAM AS ON SEPTEMBER 2017**
